

## Infusion Business Software Update

For Version: 3.03

1/08/2008

---

### **Customer Assets**

- Issue with incorrect Customer being shown in the Servicing section of Customer Assets has been corrected.
- Error created when duplicating an existing Customer Asset then selecting "No" has been fixed

### **Customers**

- Issue with Customer on Stop Credit still able to have Job created against them has been resolved.

### **Financials**

- Problem of Infusion hanging when opening Maintain Budgets after conversion from Aurora has been fixed.
- Error message "file does not exist - FINTRAND - " due to incorrect file name has been fixed.
- Alias name is already in use error message when emailing MYOB AO file from Infusion has been resolved.

### **Import / Export Module**

- The Import / Export module will now allow Supplier Invoices to be imported where the same Purchase order number has been used on them.

### **Job Management**

- Aurora One converter now imports the Next Job Number.
- Issue with costs being able to be put against a Job with a date outside the lockout dates has been fixed.
- The Default Location against a Customer is now used when a Job is created against that Customer.
- An option has been added to the Change Detail Settings in Invoicing that will allow an Invoice created from a Job and charged to another Customer to use the Charge Details on the Job or the Customer's address details

### **Products**

- Error caused when clicking the drop down box for the Destination Group under Swap Product Code if another window was open which referenced the tables database has been fixed.

### **Staff**

- The order of Staff in the lookup screen has been set back to A-Z (from Z-A) which occurred since v3.00

---

## **Suppliers**

- Error caused by having Supplier Adjustment window open twice has been fixed.

## **System**

- The Report Writer in Infusion has been removed from the main install to a separate .exe to allow it to run under FoxPro 8. This has been done to overcome problems experienced with reports crashing after being edited.
