

# Infusion Business Software Update 8.415

## Customer

Additional options for customer title now available:

"Mr & Mr", "Ms & Ms", "Mrs & Mrs".

**#11800**

## General

An error occurring on enquiry forms when the user selected Current and Last Month or Current and Last Two Months (relative to new year dates) was corrected.

**#11821**

## Invoices

Fixed an error caused by trying to edit a backorder more than once consecutively.

**#11746**

## Product

Screens containing scroll bars freezing up the software: this is an incompatibility with Team Viewer Quick Connect tool which is a plug in available with the Full Version of Team Viewer. This tool adds a button on the title bar of every application the user may be running in order to allow quick access to the specific application to other users within their network. Disabling the Team Viewer Quick Connect for Infusion resolves the problem.

For more information, please refer to the following Knowledge Base Article:

## Purchase Orders

Corrected a problem with the cursor not staying in place after deleting a line on an auto-order purchase order.

**#11805**
